

The Future of Healthcare Payments

How can healthcare providers
create **consumer-grade**
digital experiences?

1

Consider how creating a **‘digital front door’** for patients can improve their experience at every touch point

2

Providing digital payments options for pay-in and pay-out can help patients organize and manage their healthcare finances

2

Making earned wages more accessible can improve the experience for healthcare employees

3

Use technology to **increase transparency and choice**, whether it is through remote healthcare, digital apps or payment solutions

4

As healthcare looks to enhance the patient experience, it is important not to overlook healthcare workers. After all, **care will only be as good as the people providing it.**

4

By **streamlining payments processes and removing common friction points**, businesses across the care continuum can focus on what matters most: **delivering better care.**
